SUMMARY

Data-focused MSc student specializing in Data Science, AI, and business processes, with strong experience in structuring relational datasets, ensuring data consistency, and generating actionable insights. Skilled in Python, SQL, and BI tools, with a strong interest in ERP systems, enterprise workflows, and AI-driven automation.

CORE SKILLS

Data Structuring & Analysis: Relational Data Modeling, Data Consistency, Data Cleaning, EDA

Programming & Tools: Python (Pandas, NumPy, Scikit-learn), SQL, Excel, Jupyter, Git

BI & Reporting: Tableau, Power BI, Looker Studio, Dashboard Development

Techniques: Machine Learning, Natural Language Processing, Time Series Forecasting

Business Processes: KPI Tracking, Funnel Analysis, Performance Optimization

Other: A/B Testing, Data Pipelines, Stakeholder Reporting

PROFESSIONAL EXPERIENCE

Freelance Data Analyst - Today's Travel Agency

Oct 2025 – Present

- Structured and analyzed large relational datasets using Python and SQL, ensuring data consistency across multiple sources
- Identified customer segments and performance drivers, increasing campaign ROI
- Built dashboards (Tableau/Power BI) to track KPIs, improving reporting efficiency
- Designed data workflows and automated reporting pipelines to reduce manual effort
- Applied forecasting techniques to predict demand trends and support planning decisions

Digital Marketing Intern - Insightful Metrics

Mar 2024 – Oct 2024

- Analyzed campaign data (CTR, CPC, conversions) to optimize performance and ROI
- Supported structured reporting and KPI tracking across multiple channels
- Collaborated with stakeholders to improve data-driven decision-making

Vice President, Marketing - DEGIS Göttingen

Sep 2022 – Feb 2024

- Led social media strategy, increasing engagement
- Developed and executed campaigns across Instagram and Facebook
- Analyzed performance metrics and optimized communication strategies

Marketing Intern - GIHOC Distilleries Ltd.

Jun 2014 – Aug 2014

- Supported campaign execution and content development
- Conducted market research and contributed to brand awareness initiatives

EDUCATION

Double MSc. Data Science, AI & Digital Business & International Business

GISMA University of Applied Sciences Berlin & Kingston University London

Jan 2025 – Present

MSc. General Management (Grade: 1.89)

PFH Private University of Applied Sciences, Göttingen

Apr 2022 – Oct 2023

BSc. Business Administration (Marketing)

University of Ghana, Legon

Sep 2012 – May 2016

PROJECTS

Relational Data & Predictive Modeling Project

- Built structured datasets and applied machine learning models (logistic regression, decision trees)
- Performed feature engineering and model evaluation (accuracy, precision, recall)

Natural Language Processing (NLP) Project

- Processed and analyzed unstructured text data (customer feedback, reviews)
- Applied text preprocessing (tokenization, stop-word removal) and sentiment analysis
- Generated insights to support business decision-making

Data Structuring & Simulation (Academic/Practical Work)

- Created structured datasets with logical relationships across entities (e.g., customer, transactions, outcomes)
- Ensured consistency and integrity across linked data tables
- Simulated real-world business scenarios to support analysis and reporting

ADDITIONAL INFORMATION

Languages: English (Native), German (B2), French (B2)

Awards: STIBET Scholarship for Extraordinary Social Engagement (2022, 2023)

Volunteering: Student Buddy – PFH Göttingen
